## How to put sims 3 expansion packs on origin

Hand luggage at the airport in front of an airplane Do you ever find yourself packing too much luggage whenever you travel? Too much baggage can be cumbersome to carry around, not to mention easier to lose on transit. If you've been finding it hard to pack minimally, these points will help you learn how to do it like a pro. Learning how to pack like a minimalist will allow you to travel light and comfortably. **Pack Clothes That You Can Wear in Different Ways**Do you have a sweater that you can wear with slacks, a dress or a skirt? As opposed to packing three different sweaters to go with the three outfits, try packing one sweater per three outfits, depending on how much time you intend to go away. The same goes for tops and shoes. **Pack Interchangeable Pieces**Can you pair most of the outfits that you've packed with each other without looking mismatched? Avoid too many different prints and patterns. Instead, go for plain colors. Examples of plain colors that you can pair with almost anything are blue, black, white, green and grey. **Don't Pack for Every Situation**A lot of people pack things that they don't need because they anticipate situations in which they might need them. Don't assume that it might rain at your destination and carry heavy jackets and sweaters. There are plenty of resourceful online websites and apps that you can use to check coming weather for the place you wish to travel to beforehand. From there, you can pack your clothes according to the weather, instead of carrying clothes to suit different climates. **Buy a Hard-Shell Suitcase**Unlike a regular suitcase that comes in a flexible material that allows you to keep squeezing in items, a hard-shell suitcase comes in a rigid material. This suitcase has limited space and will leave you with no choice but to only pack what is necessary. The suitcases also last longer, meaning that you'll get value for your money. **Another great thing about a hard-shell suitcase is that it comes with a USB charging port, meaning that you don't have to wait in airport outlets to charge your devices.** If you're a new minimalist packer who can't decide on what to pack, this suitcase is an absolute necessity. **Pack Clothes With Quick-Drying Fabrics**Are you traveling to a location with no washers and dryers and will, therefore, have to wash your clothes by hand? Go for clothes with materials that dry quickly upon washing. That way, you'll have the opportunity to clean your dirty clothes without worrying that they'll take too long to dry. If your clothes take too long to dry you might need to buy more clothes at your destination. **Pack Comfortable Shoes**Are you that girl that loves her stilettos? When traveling, always pack sensible shoes that will allow you to move comfortably around when sightseeing. If you carry your favorite pairs of high heels, you might end up buying flats at your destination, which will increase your luggage on your way back home. **Invest in Reusable Lotion Containers**If you're traveling for a weekend, you don't need to carry huge bottles of moisturizers, cleansers and lotions. Instead, buy small reusable containers that you can use to transfer only small amounts of lotions. Another helpful tip when it comes to lotions or makeup is to look for items that serve different purposes. For instance, some cleansers also serve as makeup removers while some moisturizers contain SPF for sun protection. Instead of packing a body lotion with no SPF and a moisturizer with an SPF of 50, go for the latter to help you pack minimally. **Start Packing Early**Last minute packing can make it harder for you to decide on what items to carry because it's chaotic and rushed. In the end you might find yourself taking more than you need. Give yourself enough time to decide on what items are necessary for your trip. Come up with a strategy that will help you pack intentionally. An excellent period to execute a minimalist packing strategy is about a week. **MORE FROM BLOG LINES** Something went wrong. Wait a moment and try again. Only applicable to the 32-bit version of the Sims 3 Sometimes, after downloading a Sims 3 Expansion or Stuff Pack in Origin, the external installer will not automatically open. Furthermore, you will only get the option to download the Pack again in Origin, not to install it. If this happens do not bother clicking the download button in Origin again as the pack is already downloaded, you just need to locate it and open it. For this example let's pretend I'm trying to download and install Ambitions: Open Origin, select your Games Library, click on the Sims 3 then the Extra Content tab and locate Ambitions. Next click on the Download button and follow any prompts about the disk space it will use. Ambitions should start downloading. During the download process the only option you should get in the orange button is to pause the download. You should also see a little window showing the download process: When it has finished downloading the orange button should change to Install, you should get a dialogue window with your product code to copy, and the external game installer should automatically open. If you're reading this then probably none of those three things has happened and instead you're seeing this: The Download button is still showing but the little window is showing that the download is complete. We now need to locate the game installer manually. In Origin, click on Origin > Preferences in the menu bar (next to the Apple icon, top left of your desktop). Now click on Installs & Saves in the Origin window, then Browse installers: The DownloadCache Finder window will open and you will see the folder(s) containing the game installer(s): Double click on the file ending in .dmg to open the installer (ignore the other file ending in .map). Your Mac will verify the installer: then launch the installer: Double click on the Installer button as usual and follow the prompts to install. If you see a Game Validation Error message like this: you can ignore it as your game is at a more recent patch level than the pack is expecting, just hit Install. After the installation is complete go back to your Origin Games Library and locate the pack you've just installed, it should now show as installed: After finally getting your packs downloaded and installed you may experience further issues, notably some packs not showing up as installed in the Launcher and a constant Unknown Error message when trying to launch the game. For further information and help on those issues please read the following links: **Ambitions/Fast Lane/Late Night/Outdoor Living** add on packs not showing as installed in the Launcher or Sims 3 Applications folder. **Unknown Error** message related to macOS El Capitan/Sierra and Ambitions/Fast Lane/Late Night/Outdoor Living If you don't have your product codes you need to contact EA customer support. If you love simulation games, a newer version — Sims 4 — of the game that started it all could be a good addition to your collection. Create your characters, control their lives, build their houses, place them in new relationships and do much more. Here's how to play. **Create a Sim**While there's no wrong or right way to play Sims 4, you can't get started until you've created at least one Sim character to play with. With the Create-a-Sim tool, you can select an age and gender, along with personality traits that will impact your Sim's entire life. You can also tailor your character's appearance in any way you like. Pick an outfit, accessories, hair and eye color. Play around with body part sizes and shapes. You can even select the way your Sim walks and talks. **Build a House**Once you have at least once character (you can create as many as you like), you need a place for your Sim to live. While there are already places available within the Sim neighborhood, many players enjoy building the homes of their dreams by entering Build Mode. Here, you can build walls and rooms, and choose wallpaper, paint and flooring styles. You can add furniture and home decor along with cabinets, counters and other household items. Don't forget to landscape the outside with plants, water features and other cool objects. **Keep an Eye on Your Sim's Life Goals**Now that you have your characters and a home, you can officially begin gameplay. This means keeping your characters happy and healthy while they go about their days. Pay attention to your Sims' wishes and help fulfill them. Keep them in good moods, make sure they're working towards fulfilling their lifetime aspirations, build their skill levels and take care of all of their bodily needs. **Enter Relationships**No Sim wants to be lonely, so you'll want to incorporate relationships into your gameplay. This can be anything from starting a family to falling in love to simply interacting with other Sims in the neighborhood. Your Sim can meet another character, fall in love, get married, have children and raise children. Making friends can also help your Sims work their way through their careers. However, be careful, because Sims can make enemies through certain actions. **Make Some Money**Just like in the real world, Sims need to make money to survive and thrive. Choosing a career and working your way up is the way to do this. Astronauts, writers, entertainers, chefs — there are dozens of career options and paths. Increasing skill levels and relationships can help a Sim advance in his or her chosen career. Sims can also make money with side jobs, like writing or painting. **MORE FROM QUESTIONS ANSWERED.NET**
